Question 4 of 16

Previous

Next

Freya drew up this table to show the results when two dice are tossed together and the numbers displayed on their uppermost faces are added together.

+	1	2	3	4	5	6
1	2	3	4	5	6	7
2	3	4	5	6	7	8
3	4	5	6	7	8	9
4	5	6	7	8	9	10
5	6	7	8	9	10	11
6	7	8	9	10	11	12

Which statement is correct?

☐ There is only one way in which a 3 can be scored.

☐ There are more ways to score a 6 than any other number.

☐ There are six ways of scoring a 5.

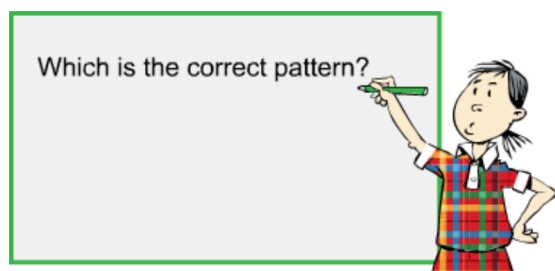

☐ There is always an even number of ways of scoring an odd number.

Question 5 of 16

Previous

Next

Olivia wrote down the first four numbers of a pattern that began with 98 and subtracted 7 each time.

☐ 98, 91, 85, 78 ...

☐ 98, 91, 84, 78 ...

☐ 98, 91, 85, 77 ...

☐ 98, 91, 84, 77 ...

Time Allowed: 20min
Time Remaining: 19min 08s

Finish Test

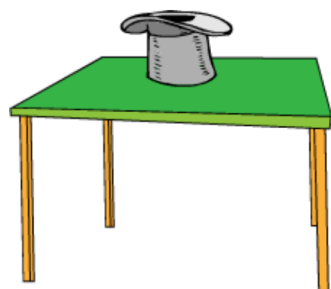

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16

Question 6 of 16

Previous

Next

A hat holds five red, four blue and three yellow tickets. If one ticket is selected at random, what is the chance that it is red?

☐ 1 in 3

☐ 5 in 7

☐ 5 in 12

☐ 1 in 5

Question 7 of 16

Previous

Next

What is the ninth number in the number pattern that begins with 4 and goes up by 3 each time?

Question 8 of 16

Previous

Next

Two candidates, Nabil and Hala, stood for year representative. Some of the results of the vote are shown in the table, but the number of girls who voted for Hala is missing.

	Nabil	Hala
Girls voted	28	
Boys voted	37	33

If 125 students voted altogether, how many girls voted for Hala?

Question 9 of 16

Previous

Next

The average (mean) of a set of nine scores is 6.
A score of 8 is included to make ten scores.

Which statement is correct?

☐ The average will decrease.

☐ The average will increase.

☐ The average will stay the same.

☐ There is not enough information to decide what will happen to the average.

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16

Question 10 of 16

Previous

Next

Some of the pairs of numbers in a pattern are given in the table.

1 st number	2	4	6	8	10	12
2 nd number	4	7	10	13	16	19

Which rule is used to find the second number?

☐ Double the first number.

☐ Multiply the first number by 3 and then subtract 2.

☐ Halve the first number, multiply by 3 and add 1.

☐ Subtract 1 from the first number and then multiply by 4.

Previous

Next

A fair coin is tossed three times and shows heads all three times.

If the coin is tossed again, which statement correctly completes the statement:
'The chance of getting a head on the fourth toss is ...'?

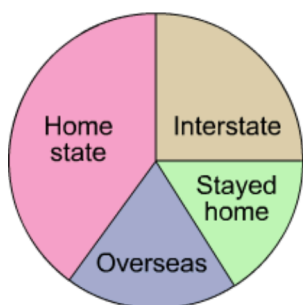

- ☐ fifty-fifty.
- ☐ small because getting four heads in a row is unlikely.
- ☐ large because the other tosses were heads so this one is likely to be heads too.
- ☐ unable to be calculated as there is not enough information.

Question 12 of 16

Previous

Next

A pie chart was drawn to show the different places holidays were taken by employees of a company.

If the company had 180 employees, how many holidayed interstate?

Question 16 of 16

Previous Finish Test

Johanna has a stall at the local market where she sells coffee tables that she has made. The graph shows the amount of money she receives for sales of her tables and the amount it costs to make them.

Sales of coffee tables

Number sold	Sales (\$)	Expenses (\$)
1	200	300
2	400	400
3	600	500
4	800	600
5	1000	700
6	1200	800
7	1400	900
8	1600	1000
9	1800	1100

In a week that she sells seven coffee tables, what does Johanna make?

☐ A profit of \$225
 ☐ A profit of \$300
 ☐ A loss of \$300
 ☐ A loss of \$175
