Next

Consider a rectangular prism.

Which statement is correct?

The number of faces plus the number of vertices = the number of edges + 2

☐

The number of faces plus the number of edges = the number of vertices + 2

☐

The number of faces plus the number of vertices = the number of edges - 2

☐

The number of faces plus the number of edges = the number of vertices - 2

The diagram shows a regular hexagon, two squares and an equilateral triangle that all meet at a point and leave no gaps around the point.

Which of these could meet at a point, leaving no gaps?

- ☐ 2 squares and 2 equilateral triangles
- ☐ 4 equilateral triangles and 1 rectangle
- ☐ 1 square, 1 rectangle and 3 equilateral triangles
- ☐ 5 equilateral triangles

Next

Four rectangular prisms have been drawn on isometric grid paper.

Which statement is correct?

- ☐ The green prism is different to the other three.
- ☐ The yellow prism is the same as the green prism and these two are different to the other two.
- ☐ The blue prism is the same as the grey prism and these two are different to the other two.
- ☐ All the prisms are the same.
